FIGURE 2.2 2018 GHI SCORES AND PROGRESS SINCE 2000

2018 Global Hunger Index Score

2018 GHI Severity Scale

Absolute change in GHI score since 2000

Source: Authors.

Note: This figure illustrates the change in GHI scores since 2000 in absolute values. The results cannot be compared to results from similar figures in previous GHI reports because of data revisions (see Chapter 1) and because previous figures featured the percentage change since 2000. This figure features countries where data were available to calculate 2000 and 2018 GHI scores and where 2018 GHI scores show moderate, serious, alarming, or extremely alarming hunger levels. Some likely poor performers may not appear due to missing data.
