www.concern.net

Source: Authors.
 Note: For the 2023 GHI, data on the proportion of undernourished are for 2020–2022; data on child stunting and wasting are for the latest year in the period 2018–2022 for which data are available; and data on child mortality are for 2021. GHI scores were not calculated for countries for which data were not available and for countries that did not meet the GHI inclusion criteria; see Appendix A in the full report for details. The boundaries, names, and designations used on the map do not imply the expression of any opinion whatsoever on the part of Welthungerhilfe (WHH) or Concern Worldwide concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers and boundaries.
